

7 GOOD REASONS FOR A CO-OPERATION WITH SONNE- INTERNATIONAL

1 Expertise and experience:

Over 20 years of experience in international cooperation and implementation of sustainable initiatives and projects in five project countries.

2 A strong network of

funding partners: Many years of cooperation with public funding organisations (Austrian Development Agency, Austrian Ministry of Sport, etc.), renowned foundations (Else Kröner Fresenius Foundation, Red Chairity, etc.), private companies and donors are clear evidence of trust and quality.

3 Conceptual quality

assurance: Professional project management and monitoring, investment in local capacities, efficient structures and processes as well as sound risk assessment ensure high-quality project development and implementation. Certified with the Austrian Donation Seal of Approval, we stand for transparency and sustainable impact.

4 Efficient administration:

With administration costs of less than 10%, funds are used efficiently and with the lowest possible administrative expenses for sustainable projects. Through an extensive and long-standing network of corporate partnerships, running costs (e.g. office space, printing costs) can be kept to a minimum.

5 Focus on Localisation:

Direct implementation by our SONNE branches and long-term investment in strengthening our local partner organisations. This enables effective project work that is based on the needs of the communities and benefits from strong local knowledge and ownership. We are passionate about strengthening our local teams and working in partnership on an equal footing. A central role of the team in Austria is capacity building in our project countries.

6 Marginalised regions and remote project locations:

We go where help is lacking and work in hard-to-reach and severely neglected communities and regions, such as nomadic communities in the remote Afar region of Ethiopia or the neglected mountainous regions of Bangladesh.

7 Sustainability through community-based development and ownership:

Through our strong local networks and our bottom-up approach, we promote local responsibility and the long-term sustainability of our projects. We stand for innovative and creative solutions that are developed jointly with our target communities.
